

This folder contains critical information that you may need if Mom and/or I are incapacitated or deceased.

The subfolder names should give you an index to the information.

In each subfolder, you should see a "ReadMeFirst.doc" or a .pdf equivalent.

The entire folder structure exists on the desktop of computer "Ruby", under the folder name "Emergency Information".

Some of the references are to other folders on Ruby.

**The most useful starting point is the file "Phasor.docx" in the folder "On Line Info". This gives you all of our user names and passwords, as well as useful things like Social Security numbers, Medicare numbers, Bank info, etc.**
